CONNECT
HOMES

EVERYONE DESERVES A PLACE TO CALL HOME

By now, you know that we build modular prefab homes and ADUs. But did you know we build shelters and supportive housing too?

We partner with government agencies and other organizations to create secure, high-quality shelters for permanent or temporary use. Our assembly-line production makes it possible to build quickly and affordably. And unlike shed structures, our shelters are comfortable and designed to feel like home.

Accelerate your impact with Connect Shelter

Connect Shelter projects can come together quickly, to benefit the community as soon as possible. For example, in Mountain View, CA we helped transform a storage site for abandoned cars into secure, dignified housing for 120 people in just six months. The solution includes 30 Shelter 4 units and common area buildings, to provide both housing and community support services. The project won the prestigious ULI Award for Excellence, and was funded by California's \$3.75 billion Homekey program.
